

True power of energy event

Members of Fairer World Lindfield recently hosted an Energy Hub, inviting members of the local community to learn more about energy-saving tips such as wall insulation, how to reduce energy bills, increase wildlife in the garden with garden ponds, digital tips, greener verges and more.

There was a steady flow of visitors throughout the morning with Fairtrade tea, coffee and cake very

generously donated by Ali from the local Co-op.

Andi, the Stand Up Inn manager, brought along her 'Fill Good Store' van, which was full of produce from roasted chickpeas, herbs and spices and all sorts of household ingredients - a fantastic service where goods can be bought more cheaply and containers reused to save on plastic waste!
